

Fund description and summary of investment policy

The Fund invests mainly in selected shares and it uses exchange-traded derivative contracts on stock market indices to substantially reduce its net equity exposure to within a range of 0-20%. As a result, the Fund’s return depends on the level of short-term interest rates (implicit in the pricing of the sold futures contracts) and the performance of the Fund’s selected shares relative to the stock market index. The Fund’s return is therefore unlikely to be correlated with equity market returns. In addition, a portion of the Fund is typically invested in cash and margin deposits.

ASISA unit trust category: South African – Multi Asset – Low Equity

Fund objective and benchmark

The Fund aims to provide investors with long-term positive returns higher than those available in the money market sector, irrespective of stock market returns. The Fund’s benchmark is the daily interest rate as supplied by FirstRand Bank Limited.

How we aim to achieve the Fund’s objective

The Fund invests in selected shares and seeks to substantially reduce stock market risk by selling exchange-traded equity index derivatives. The selected share portfolio is derived from our thorough research process, but the selection of equities in this Fund may differ from that in the other Allan Gray funds. The deviation of the Fund’s selected share portfolio from the composition of the underlying benchmark indices (on which the derivative contracts are based) is restricted and closely monitored. This does not eliminate the risk of capital loss should the selected equities underperform.

Suitable for those investors who

- Seek absolute (i.e. positive) returns regardless of stock market trends
- Require a high degree of capital stability over a 3-year time horizon
- Wish to invest in a product that offers uncorrelated returns relative to shares or bonds as a ‘building block’ in a diversified multi-asset class portfolio

Fund information on 31 January 2025

Fund size	R0.8bn
Number of units	22 466 027
Price (net asset value per unit)	R24.11
Class	A

Performance net of all fees and expenses

Value of R10 invested at inception with all distributions reinvested

1. The Fund’s benchmark is the daily interest rate, as supplied by FirstRand Bank, performance as calculated by Allan Gray as at 31 January 2025.
2. This is based on the latest available numbers published by IRESS as at 31 December 2024.
3. Maximum percentage decline over any period. The maximum drawdown occurred from 6 February 2020 to 15 September 2020. Drawdown is calculated on the total return of the Fund (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund’s monthly return. This is a measure of how much an investment’s return varies from its average over time.
6. These are the highest or lowest consecutive 12-month returns since inception. This is a measure of how much the Fund and the benchmark returns have varied per rolling 12-month period. The Fund’s highest annual return occurred during the 12 months ended 30 September 2003 and the benchmark’s occurred during the 12 months ended 30 September 2003. The Fund’s lowest annual return occurred during the 12 months ended 31 August 2020 and the benchmark’s occurred during the 12 months ended 30 November 2021. All rolling 12-month figures for the Fund and the benchmark are available from our Client Service Centre on request.

% Returns	Fund	Benchmark ¹	CPI inflation ²
Cumulative:

Highest annual return ⁶	18.1	11.9	n/a
Lowest annual return ⁶	-8.2	2.5	n/a

Meeting the Fund objective

Since inception the Fund has outperformed its benchmark. Over the latest 10- and five-year periods, the Fund has underperformed its benchmark which is the daily interest rate supplied by FirstRand Bank Limited. The Fund aims to deliver long-term positive returns, irrespective of stock market returns.

Income distributions for the last 12 months

To the extent that income earned in the form of dividends and interest exceeds expenses in the Fund, the Fund will distribute any surplus biannually.	30 Jun 2024	31 Dec 2024
Cents per unit	59.0784	37.8455

Annual management fee

The fee rate is calculated daily by comparing the Fund's total performance to that of the benchmark.

Fee for performance equal to the Fund's benchmark: 1.00% p.a. excl. VAT

The Fund is first required to recover any underperformance before a fee higher than the fee for performance equal to the benchmark can be charged. This is known as a high watermark. If the Fund's performance is above its previous high watermark, we add 0.2% to the fee for each percentage of performance above the high watermark. The fee is uncapped.

Total expense ratio (TER) and transaction costs

The annual management fee is included in the TER. The TER is a measure of the actual expenses incurred by the Fund over a one and three-year period (annualised). Since Fund returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns (refer to page 4 for further information). Transaction costs are disclosed separately.

Top 10 share holdings on 31 December 2024 (updated quarterly)

Company	% of portfolio
British American Tobacco	9.0
Naspers & Prosus	8.3
AB InBev	5.4
Absa Group	4.7
Gold Fields	4.7
FirstRand	4.7
AngloGold Ashanti	4.1
Premier Group	3.8
Sappi	3.6
Sasol	3.2

Asset allocation on 31 January 2025

Asset class	Total
Net equities	4.8
Hedged equities	79.4
Property	0.0
Commodity-linked	0.0
Bonds	0.0
Money market and cash	15.8
Total (%)	100.0

Since inception, the Fund's month-end net equity exposure has varied as follows:

Minimum	-3.6% ⁷ (September 2016)
Average	4.6%
Maximum	15.4% (November 2018)

7. The negative net equity exposure as at 30 September 2016 is due to the cash acquisition of SABMiller by Anheuser-Busch In-Bev. This was corrected and the Fund had a positive net equity exposure by 4 October 2016.

Note: There may be slight discrepancies in the totals due to rounding.

The last quarter of 2024 saw the local market marginally unwind some of the strong gains posted over the preceding two quarters as it digested the outcome of the US presidential election in November and the latest actions from central banks, all while concerns regarding growth prospects in the world's largest economies persisted. Despite the weaker end, for the full year the FTSE/JSE All Share Index returned 13.4%, its strongest showing since its post-COVID bounce in 2021.

Buoyed by the outcome of South Africa's national elections, shares with greater exposure to the domestic economy were among the best performers on the JSE this year. The FTSE/JSE Financials Index, comprising mostly banks and insurers, gained 22.4%, while retailers and other select local industrials performed even stronger. For the most part, the rally to date has been driven more by a sentiment-based multiple rerating, from a depressed base, as opposed to a widespread positive uptick in earnings growth. For investment gains to be held and advance into a multi-year recovery, it is crucial that progress is made in addressing structural inhibitors to growth in the country. The fleeting returns seen during "Ramaphoria" remain fresh in investors' minds, helping to explain why foreign investor flows into our equity market – important "new money" – have remained on the sidelines thus far. The prolonged suspension of loadshedding has been a crucial step, but as always, caution is needed – particularly where undue optimism has run ahead of fundamentals.

Resource shares proved the biggest drag on index returns in the last quarter, with the FTSE/JSE Resources Index falling by 9.0%, and 8.6% for the full year. Thus far, the raft of stimulus measures announced by the Chinese government in September have fallen short of the scale required to reinvigorate the residential property market, with prices continuing to fall into year end.

As the largest store of household wealth, this has a significant impact on the consumptive side of the economy, which the government sees as the longer-term engine of economic growth. Despite the prevailing environment, prices for commodities with significant exposure to Chinese demand have not fallen as much as expected. For example, iron ore was down 27.2% but remains above US\$100 per tonne and copper was up 2.7% for the year – potentially an indicator that further downside may be ahead before a bottom in the market can be called with any confidence.

Among the non-resource "rand hedges", annual returns were more mixed, with Naspers/Prosus and British American Tobacco performing strongly, Richemont and Bidcorp trading water, and AB InBev lagging as consumer staple shares remain out of favour globally.

Against this backdrop, the Fund returned 3.2% in the last quarter of 2024 and 8.4% for the year, ahead of its benchmark. Overweight positions in Premier Group and British American Tobacco contributed, as has been the case for most of the year, together with holdings in a basket of local shares (MultiChoice, Brait, Italtile and Cashbuild). The Fund's meaningful exposure to gold miners (Pan African Resources, AngloGold Ashanti) also aided returns. Detractors from performance included overweight positions in Mondi, Sasol and AB InBev, as well as an underweight exposure to Capitec.

During the quarter, we added to the Fund's existing Aspen Pharmacare and Spar holdings, and exited its positions in Italtile and Hyprop.

Management Company

Allan Gray Unit Trust Management (RF) (Pty) Ltd (the "Management Company") is registered as a management company under the Collective Investment Schemes Control Act 45 of 2002, in terms of which it operates unit trust portfolios under the Allan Gray Unit Trust Scheme, and is supervised by the Financial Sector Conduct Authority (FSCA). The Management Company is incorporated under the laws of South Africa and has been approved by the regulatory authority of Botswana to market its unit trusts in Botswana, however, it is not supervised or licensed in Botswana. Allan Gray (Pty) Ltd (the "Investment Manager"), an authorised financial services provider, is the appointed investment manager of the Management Company and is a member of the Association for Savings & Investment South Africa (ASISA). The trustee/custodian of the Allan Gray Unit Trust Scheme is Rand Merchant Bank, a division of FirstRand Bank Limited. The trustee/custodian can be contacted at RMB Custody and Trustee Services: Tel: +27 (0)11 301 6335 or www.rmb.co.za.

Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes.

Fund mandate

Funds may be closed to new investments at any time in order to be managed according to their mandates. Unit trusts are traded at ruling prices and can engage in borrowing and scrip lending. The funds may borrow up to 10% of their market value to bridge insufficient liquidity.

Unit price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 16:00 each business day. Purchase and redemption requests must be received by the Management Company by 14:00 each business day to receive that day's price. Unit trust prices are available daily on www.allangray.co.za.

Fees

Permissible deductions may include management fees, brokerage, securities transfer tax, auditor's fees, bank charges and trustee fees. A schedule of fees, charges and maximum commissions is available on request from Allan Gray. For more information about our annual management fees, refer to the [frequently asked questions](#), available via the Allan Gray website.

Total expense ratio (TER) and transaction costs

The total expense ratio (TER) is the annualised percentage of the Fund's average assets under management that has been used to pay the Fund's actual expenses over the past one- and three-year periods. The TER includes the annual management fees that have been charged (both the fee at benchmark and any performance component charged), VAT and other expenses like audit and trustee fees. Transaction costs (including brokerage, securities transfer tax, Share Transactions Totally Electronic (STRATE) and FSCA Investor Protection Levy and VAT thereon) are shown separately. Transaction costs are necessary costs in administering the Fund and impact Fund returns. They should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Since Fund returns are quoted after the deduction of these expenses, the TER and transaction costs should not be deducted again from published returns. As unit trust expenses vary, the current TER cannot be used as an indication of future TERs. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. Instead, when investing, the investment objective of the Fund should be aligned with the investor's objective and compared against the performance of the Fund. The TER and other funds' TERs should then be used to evaluate whether the Fund performance offers value for money. The sum of the TER and transaction costs is shown as the total investment charge (TIC).
